AUTOMOTIVE STORAGE

Before you store your vehicle with us, please follow the requirements below:

- ☐ Vehicle must run and drive
- ☐ Vehicle must be clean (free from any major road debris, salt, etc). This helps keep our facility clean and more importantly prevents any unnecessary paint/frame damage during prolonged storage
- ☐ Vehicle should have no major leaks, if you have a small leak please inform us so we can provide drip trays when necessary
- ☐ Vehicle must be insured during storage (for any specialty vehicles (i.e. race cars/bikes) please contact us)
- ☐ Ensure you take any and all personal belongings from the vehicle
- ☐ **Please ensure car has less than a quarter of a tank of fuel**

Recommendations to make sure your vehicle is properly stored:

- ☐ We highly recommend a car/bike cover (this ensures maximum protection during storage)
- ☐ The battery should be in good condition for prolonged storage - we offer battery tending to alleviate this concern
- ☐ Change your oil - storing your vehicle with fresh oil will reduce the risk of harmful contaminants working away at your engine
- ☐ Adding fuel stabilizer - this will stop any oxidation and chemical breakdown in your fuel
- ☐ Increase tire pressure to prevent flat spots (+5 psi)
- ☐ Bikes should have their chains cleaned
- ☐ Carbureted bikes should have fuel petcock in the off position during storage
- ☐ *Sports bike owners - if you own paddock stands feel free to bring them with you and we will store your bike on them*

What to expect when storing your car with us:

- We will ask to see proof of ownership/insurance
- We will need a copy of your license as well as contact info
- We will inspect every car/bike upon arrival to our facility - noting the following:
 - Any existing damage (scratches/dents/imperfections) to the body and wheels
 - Mileage
 - Leaks of any type
- We will need to hold on to a key for your vehicle - which will be kept in a locked safe.

Additional Options:

- Battery Tender
 - this will help keep your battery in great health over the storage period
- Tire Saver
 - A tire saver will help prevent flat spots on your tires
- Car Cover
 - A car cover will keep your paint protected throughout the storage period
